

Patina

About Us

Patina is San Francisco based studio.

I'm Sreeni - I was previously a UX Designer at NVIDIA and Google and I studied Human-Computer Interaction at Harvard. Now I help ambitious startups design intuitive product experiences that balance user needs with business goals.

Or choose a monthly retainer for \$8K / month

What to Expect

CONTRACT We request 50% upon signing and 50% upon delivery.

ONBOARDING For branding, we send over a form with questions about your company, your audience, business model, customer acquisition channel, goals with the design etc and meet right after for a kickoff meeting.

For UX, in addition to the above, we request any available user research and relevant material (or we can do that ourselves). Then we have a kickoff meeting.

INITIAL CONCEPTS We share initial concepts for feedback.

For branding, you pick the direction you prefer.

For UX, we will focus on the UI and design decisions as it relates to user workflows and friction we want to eliminate.

DESIGN ITERATIONS We will be in touch through the process on a chat for async or zoom updates.

HANDOFF For branding, the files will come in multiple formats including png, jpg, ai, svg.

For UX, we handoff work as a Figma file with developer notes.

The Client owns all produced work. Our creation and all intellectual property rights associated with it are given to the Client after the work has been paid for in full.
